PROFESSIONAL SUMMARY

Frontend developer with 3 years of experience in the React and Next.js ecosystem. Proficient in application performance optimization using techniques such as memoization, optimization (code splitting, image optimization), virtualization, big data handling, network optimization, CSR/SSR, and advanced state management with Redux and React Query for seamless data synchronization. Strongly focused on building scalable, high-performance web solutions with clean code and robust frontend architecture. Proficient in ensuring application reliability using Sentry to deliver efficient and sustainable technology solutions.
